

WeaveIt

is designed by Sally Breckenridge, a hand weaver and a Windows programmer. During the day she specializes in designing user interfaces for non-computer oriented people and at night she loves to weave. WeaveIt emphasizes ease of use for the weaver who would rather be weaving than fighting with computers.

WeaveIt Basic

is a weaving program designed for the weaver who wants a basic drawdown program and to calculate warp and weft yarn information.

WeaveIt Pro

has all the features of the basic program plus it is a full-featured weaving design program aimed at the weaver who wants to design drafts creatively.

System Requirements:

Windows 98/Me/XP/Vista or
Windows NT/2000/2003

Download a **Free Demo** at

Shipping Charges: USA & Canada \$6.00, Foreign \$15.00 Foreign Orders require credit card (MasterCard or Visa) or a foreign bank draft drawn on US dollars	

WeaveIt 6.0

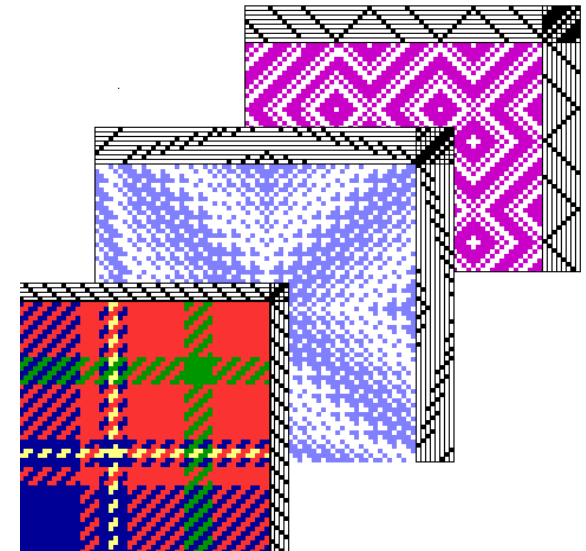

**Weaving Program
for Windows
with two choices**

WeaveIt Basic

– *A basic drawdown program*
and

WeaveIt Pro

– *An advanced design tool*

Features in both *Weavelt Basic* and *Weavelt Pro*:

- Easy to use user interface
- **On-line Tutorial** to get you started
- Extensive **on-line help** and glossary of weaving terms
- Up to: 64 harnesses, unlimited treadles
- No limit on number of warp & weft threads
- Balanced, Warp faced, Weft faced, and Warp-rep Weave, Double Weave
- **Copy draw-downs** to Windows Clipboard
- View multiple patterns open at same time
- Cut and paste threading between patterns
- Display treadling going up instead of down as Swedish weavers do.
- **WIF weaving independent file format** allows you to exchange weaving drafts with other weaving programs.
- **File management** helps you to keep track and find your pattern files. View thumbprints of the draft without opening.
- **Save to Jpeg or Bitmap.**

Editing Features

- **Edit in the main window.** Or in dialogs
- Customize tie-ups with a **click of the mouse** or create tie-ups from a list of common tie-ups.
- **Easy to create and edit** threading and treadling and tieup drafts.
 - ⇒ Cut, paste, copy, reverse
 - ⇒ Flip and Wrap in both directions
 - ⇒ Undo any editing action
 - ⇒ Repeating sections
 - ⇒ Annotations
 - ⇒ Computer recognizes tabby & borders
- **“Tromp as Writ”** with a single click
- Edit in the peg plan mode
- Draw lines or free-hand

Color Management

- **Color customization...** create colors using the Windows color wheel.
- **Color Sequences...** Create plaids and stripes over any weave structure.
- **Color N Weave** Quickly generate color and weave effects.

Project Calculations

- Computes number of warp ends.
- **Computes yardage requirements** for warp and weft
- **Handles Variable Width Yarns**
- Given loom dimensions will compute finished fabric dimensions
- Computes number of heddles required for each harness
- Recognizes floating selvages
- Metric units available
- Yarn Database simplifies re-using your favorite yarns

Display Options

- **Many zoom levels**
- Display fully annotated pattern.
- Display project calculations
- View backside of draw-down
- Display/edit treadling as lift plan
- **View thread interlacement**

Printing

- Excellent printing of patterns, project information and draw downs.
- **Prints to any printer** supported by Windows.
- **Print Preview** with layout options

Name Drafting

- Enter the text, and **automatically generate overshot draft.**
- Individual control over letter mapping

Weavelt Pro Features

Additional Editing/Drafting Features

- **Multiple treadles** per pick
- **Turn** the draft
- **Blend** two drafts
- **Interleave** two drafts
- **Rearrange** threading shafts and treadling shafts.
- **Find the long floats**
- **Design with parallel lines**

Additional Project Calculations

- **sectional warping**

Additional Display Options

- Display layers for **Double Weave**

Additional Special Features

- **Fabric Analysis...** Compute the threading, treadling and tie-up from a design motif. Import your motifs from other drawing programs
- **Network Drafting...** Let the drafting wizard guide you through creating network drafts.
- **Block Substitution...** Create a profile draft and use a wizard to pick the unit weave and options. Weavelt generates the threading draft. **Custom Blocks**
- **Double Width wizard.** Create a double width pattern from any threading draft. The wizard does the hard part.
- **Taquete, Samitum, Polychrome.** Special design window for color block profiles. Automatically generates pattern.

Loom Control Interfaces for:

- ◆ AVL Compu-Dobby I & II & III
- ◆ JMade JComp
- ◆ Louet Magic, Ocado & Megado
- ◆ Leclerc 16 shaft
